SAN SALVADOR — Only a decade after its independence, El Salvador has become a place of tension and conflict. The country's leaders have often referred to the leftist guerrillas as "terrorists," "forces of darkness" and "allies of Satan." But the movement's growth has been steady, and it has become a major challenge for the country's leaders.

The movement's growth has been fueled by a variety of factors, including economic distress, political repression, and ideological beliefs. The movement's leaders have sought to build a new society based on ideals of justice and equality, and they have been willing to use violence to achieve their goals.

The movement's leaders have also been able to attract a wide range of supporters, including students, workers, and intellectuals. They have been able to use the media to spread their message, and they have been able to use their influence to pressure the government to make changes.

The movement's leaders have also been able to attract international support, including from a variety of countries and international organizations. They have been able to use this support to fund their activities and to gain international attention for their cause.

But the movement's leaders have also faced challenges, including economic difficulties, political repression, and international pressure. They have been forced to adapt their strategies and to change their tactics in response to these challenges.
